Macintosh Guided Tours: Don't Use with Two-Page Monitor

Article Created: 14 June 1991

Article Last Reviewed: 2 June 1992

Article Last Updated:

TOPIC -----

My Macintosh IIX Tour Disk bombs at various points and never runs successfully. I'm using a two-page monitor display.

DISCUSSION -----

The tour disks were not written to take advantage of monitors larger than the 13 inches. Try running the tour on a standard black and white or color monitor. This will take care of your problem.
