Macintosh Tutorial: Not Enough Memory Error Resolution (5/95)

Article Created: 21 October 1994

Article Reviewed/Updated: 16 May 1995

TOPIC -----

Whenever I launch Macintosh Tutorial Part 1 from the balloon menu on a Power Macintosh, I get the error, "Not enough memory to run Macro Media Player."

DISCUSSION -----

There are two solutions to the "Not enough memory to run Macro Media Player" error when launching Macintosh Tutorial Part 1 from the balloon menu:

Use Fewer Colors

Open the Monitors control panel and switch to 256 or fewer colors.

Increase Memory Allocation

Open the "Tutorial Items" folder inside the Extensions folder and increase the memory allocation of the "Macintosh Tutorial Part 1" application from 2048K to 3000K.
