HyperCard: Types of Visual Effects

Article Created: 1 September 1987
Article Last Reviewed: 10 July 1992
Article Last Updated: 10 July 1992

Here's a list of HyperCard's varied visual effects which may be used in HyperTalk scripts:

```
-- barn doors open/close
-- checkerboard
-- iris open/close
-- dissolve
-- scroll right/left/up/down
-- shrink to top/center/bottom
-- stretch from top/center/bottom
-- venetian blinds
-- wipe right/left/up/down
-- zoom open/close/in/out
```

For example, the following script zooms opens the Help stack when you click the Help icon in the Home stack.

```
on mouseUp
    visual effect zoom open
    go to stack "Help"
end mouseUp
```

You can also control a visual's speed: very fast, fast, slow, or very slow.

For example:

```
on mouseUp
    visual effect zoom open very fast
    go to stack "Help"
end mouseUp
```
