HyperCard: Problems Selecting and Highlighting Text (7/92)

Article Created: 16 November 1990

Article Reviewed/Updated: 23 July 1992

TOPIC -----

If I select some text in a field and then click a button, the selection goes away. What can I do?

DISCUSSION -----

You can turn off the autohilite in the button. (Choose the Button tool and double click on the button. In the dialog that opens up, uncheck the "hilite" box.) The Human Interface Guidelines state that only one item (text, a button, etc.) can be hilited at a time.
