HyperCard and Diacritical Characters (7/92)

```
Article Created: 10 April 1991
Article Reviewed/Updated: 23 July 1992

TOPIC -----------------------------------------------------------

In sorting and finding, HyperCard treats characters with diacriticals the
same as other characters.

DISCUSSION ------------------------------------------------------

For example, the French e with accent is treated as an e without accent,
and German vowels with Umlaut are treated the same as vowels without
Umlaut.  (These characters are not reproduced here because AppleLink is
limited to plain ASCII text.)
