HyperCard: Error -199 May Be Map Resource Problem

This article last reviewed: 5 October 1988

If you are receiving a "-199" error, when using HyperCard "snd" sound
resources, it is probably not due to an excess of resources. A file can contain
a maximum number of 2727 resources.

The "-199" error is probably caused by a problem with the file resource map.
Try removing and then replacing the "snd" resources.
