HyperCard: Handler for Moving Handlers Between Scripts (7/92)

Article Created: 11 January 1991
Article Reviewed/Updated: 23 July 1992

TOPIC ---

Given the name of a handler and a script, this handler puts the text of the
specified handler into the specified script, replacing the previous version
of the handler in that script.

DISCUSSION --

```
function putHandler newHandler,scriptText
  -- Place a handler into a script.
  -- Given the name of a handler and a script, this handler puts
  -- the text of the specified handler into the specified script,
  -- replacing the previous version of the handler in that script.

  put word 2 of newHandler into handlerName
  put getHandler(handlerName,scriptText,true) into offsets
  put item 1 of offsets into startChar
  put item 2 of offsets into endChar
  put newHandler & return into char startChar to endChar of scriptText
  return scriptText
end putHandler
```
