HyperCard: Handler for Selecting Groups of Cards (7/92)

Article Created: 11 January 1991
Article Reviewed/Updated: 23 July 1992

TOPIC ---

This handler adds the current card to the list of selected cards. After
you've selected a group of cards, you can perform operations on all of them
using doToSelectedCards.

DISCUSSION --

```
on selectCard clearSelection
  -- Group selection of cards.
  -- This handler adds the current card to the currently
  -- selected cards or clears the list of currently selected cards:

  global selectedCards
  if clearSelection is not empty then
    put empty into selectedCards
    put "No cards selected."
  else
    get long id of this card
    if it is in selectedCards
    then put word 1 to 3 of it & " is already selected."
    else
      put it  & return after selectedCards
      put word 1 to 3 of it & " is now selected."
    end if
  end if
end selectCard
```
