HyperCard: Moving Between Open Scripts (7/92)

Article Created: 16 November 1990

Article Reviewed/Updated: 23 July 1992

TOPIC -----

In HyperCard, you can have more than one script window open at once. This article describes how to move between them.

DISCUSSION -----

To move between the windows that contain scripts:

- Click to activate the script window in which you want to work.
- Choose an open script window from the Go menu.

To move between all open windows (including windows that contain stacks):

- Choose Next Window from the Go menu (or press Command-L).
