HyperCard: Disabling Option-Tab Key Combination (9/93)

Article Created: 23 September 1993

TOPIC -----

How can I disable the keyboard shortcut (Option-Tab) for opening and closing HyperCard's Tools palette?

DISCUSSION -----

Here's a handler that does it:

```
on KeyDown TheKey
  if theKey = Tab and the optionKey is down then
    exit keydown
  else
    pass keydown
  end if
end KeyDown
```

By including this handler in your stack script, as part of simple error checking, this will prevent anyone from accidentally hitting the keys to activate the Tool palette.
