HyperCard 1.0 and 1.0.1: Intermittent Laser Font Problem

This article last reviewed: 10 September 1987

When HyperCard documents are printed to a LaserWriter Plus, certain fields that contain LaserWriter fonts (Helvetica and Times for example) sometimes print as though they are not LaserWriter fonts. When Font Substitution is turned on, some Helvetica fields print in Helvetica, some are bit-mapped. With Font Substitution turned off, all Helvetica and Times are bit-mapped.
