HyperCard 1.2.5: Disks Are Mislabelled as 1.2.3

This article last reviewed: 5 February 1990

TOPIC ---

This article contains information about HyperCard version 1.2.5, which has been
mis-labeled in some situations as v1.2.3.

DISCUSSION --

Some users are buying Macintoshes and getting disks labeled HyperCard version
1.2.3 -- although the "About" box shows version 1.2.5.

HyperCard version 1.2.3 was an internal testing version and never distributed
to the general public as a product.

Despite what may be listed in some publications, the CORRECT HyperCard version
for use with the Macintosh Portable and Macintosh IIci, under System Software
6.0.4, is HyperCard version 1.2.5.
