HyperCard 2.0: How To Get Updates

Article Created: 5 March 1991

Article Last Updated:

TOPIC --

There are several commercial stacks shipping that require HyperCard 2.0 v1,
HyperCard 2.0 v2, and so on. I want to use these stacks but don't want to
necessarily buy a full HyperCard bundle from Claris. Is there a way for me
to get an update from Apple, or must I purchase HyperCard from Claris to
get an update?

DISCUSSION ---

HyperCard is a Claris product, and customers should contact them regarding
software updates. Claris will send a disk containing HyperCard 2.0v2,
HyperCard Fonts, and a small Home stack to any owner who requests it.

Customers who purchased the Software Update package for HyperCard or the
Network Admin package will be shipped the same software Apple is including
with its computers.

Claris says that the HyperCard 2.0 upgrade is the best way to go. The
upgrade includes the new Script Language Guide, a guide to the new
features, and the complete set of HyperCard disks.
