Compatibility Checker 7.1: There Is No HyperCard 2.1v1 (8/93)

Article Created: 26 August 1993

Article Reviewed/Updated: 27 August 1993

TOPIC -----

The Compatibility Checker included with Apple's System 7.1 contains an error as it applies to HyperCard.

DISCUSSION -----

The Compatibility Checker states that you must have version 2.1v1 of HyperCard in order to be compatible. This is not a valid version number for HyperCard. The latest version of HyperCard is simply 2.1 and it is the correct version to use with System 7.1.

However, labels on the outside of retail packages of HyperCard 2.1 may be labeled in error as "HyperCard 2.1.1".
