## HyperCard 2.2: Color and Media Integration (12/93)

Article Created: 13 December 1993

TOPIC -----

This article, extracted from the Apple press release announcing HyperCard 2.2, describes the new Color Tools and media integration features.

DISCUSSION -----

HyperCard's new Color Tools enhance the usability and visual appeal of existing and new solutions. In addition to importing and resizing color PICT graphics, users can select from a palette of 256 shades to color HyperCard elements such as buttons, fields, cards, and backgrounds. HyperCard's QuickTime tools allow users to incorporate movies into cards and stacks with point and click simplicity.

HyperCard continues to help multimedia authors differentiate their product by providing comprehensive multimedia capabilities in one environment. With ADDmotion II, HyperCard 2.2 facilitates easy media, color, and sound editing to help users enhance the value of new and existing stacks. ADDmotion II is a 24-bit color paint, animation and sound extension that integrates seamlessly into HyperCard and provides tools for controlling and editing animations and sounds.
