## HyperCard 2.2 & Performa: If System Hangs After Install (2/94)

Article Created: 24 December 1993

Article Reviewed/Updated: 17 February 1994

TOPIC -----

This article describes a problem with the HyperCard 2.2 Installer on Macintosh Performa systems. An incompatibility with the Performa system software sometimes causes a system to hang if you hit the Restart button at the end of the HyperCard 2.2 installation script, even though the installation was successful.

DISCUSSION -----

To confirm that HyperCard was successfully installed, restart your computer and launch HyperCard.
