## HyperCard 2.1 Player: Error t63 (4/93)

Article Created: 23 April 1993

TOPIC -----

What is HyperCard's error "t63"?

DISCUSSION -----

Error t63 is generated by the HyperCard 2.1 Player. The error mechanism in the Player is different from HyperCard's. HyperCard Player produces a letter indicating the error type and then a number indicating an exact message.

In this case, the "t" refers to the string resource "Talk Errors" and "63" means: Can't understand "^0".

For more information on HyperCard Player Error Messages refer to the Technical Information Library on AppleLink. Follow this folder structure:
