HyperCard: Printing Problem to Kodak Diconix (8/93)

Article Created: 6 July 1993
Article Reviewed/Updated: 2 August 1993

TOPIC --

My stack has a simple "Print Report" command in a custom menu. This
menu item will not print to a Kodak Diconix 180si ink-jet printer from
HyperCard 2.1, even though it prints fine to standard Apple printers.

DISCUSSION ---

The stack will print to the Diconix if "Print Report" is chosen from the
File menu. This represents a probable incompatibility between the Diconix
driver and HyperCard. Kodak is aware of this problem. HyperCard is not
certified with the Diconix printer.
