HyperCard: Disabling Arrow Keys while Keeping Text Arrows (8/93)

Article Created: 17 May 1993
Article Reviewed/Updated: 2 August 1993

TOPIC ---

To disable navigation through a stack with arrow keys, while still allowing
arrow keys to be used in a field, put the following handler in the stack or
background script.

DISCUSSION --

```
on arrowKey
    if the selectedField is not empty then pass arrowkey
end arrowkey
```

This will make sure that the cursor is within a field before passing the
arrowKey.
