## HyperCard 2.1: Send Message Error (10/92)

Article Created: 15 July 1991

Article Reviewed/Updated: 30 October 1992

TOPIC -----

The "Send Message..." error message may appear in the Apple Event Primer Stack that ships with HyperCard 2.1.

DISCUSSION -----

To resolve the problem:

- 1) Be sure you're at userLevel 5, is running HyperCard 2.1, and System 7.0 or later.
- 2) Open stack Apple Event Primer.
- 3) Go to card "Conversing" by clicking the "Chat" button on the first card.
- 4) Edit the script of card button "Send Message..." by clicking the "Send Message..." card button while holding the Option and Command keys down.
- 5) Locate line 20 (empty lines count, too) of the mouseUp handler (bold down below but not in the stack).
- 6) Replace "Apple event Primer" in line 20 with "Gossip", so that the line now reads "send "Gossip" && quote & theNews &-".
