HyperCard 1.x: Converting Stack Ideas to 2.x (7/92)

Article Created: 30 March 1992

Article Reviewed/Updated: 23 July 1992

TOPIC -----

Version 1.x of HyperCard included a stack named "Stack Ideas" that contained several templates to be used in creating new stacks. Two of these templates, "Monthly Cal" and "Weekly Cal 3", had problems after being converted to 2.x.

DISCUSSION -----

- With the "Weekly Cal 3" stack the date fields were not large enough to hold the full date. Therefore, the 14th of March would show as 1. This is caused by changes in the HyperCard text engine, where non-proportionally spaced fonts need a bit more room to be displayed. Enlarging the individual fields solves the problem.
- The problems with "Monthly Cal" are a bit more complex. Problems occurred as a result of some scripting errors encountered when using the "Extend" button.
