HyperCard: Starting QuickTime Tools Stack (7/92)

Article Created: 30 March 1992

Article Reviewed/Updated: 23 July 1992

TOPIC -----

The HyperCard Development Kit and HyperCard Upgrade each have an additional button installed on the Home Stack to access the QuickTime Tools Stack. However, you may find that clicking this button doesn't take you to the QuickTime Tools stack.

DISCUSSION -----

This happens when the compressed QuickTime Tools Stack that ships with HyperCard has not been decompressed. If you do not decompress the stack before trying to access it, the Home Stack doesn't recognize the file as a HyperCard stack.

To correct this problem, simply double click on the compressed file to decompress it. Then return to the Home Stack where the QuickTime Tools button should now be working.
