Problems Copying Reports Between HyperCard Stacks (3/94)

Article Created: 4 March 1994

TOPIC ---

I tried to copy an Avery Mailing Label report from the Address stack that comes
with HyperCard 2.2 into my own 2.1 Address stack, and it's not copying
correctly. The original label report had three columns and ten rows, and the
pasted version has two columns and eight rows. What's wrong?

DISCUSSION --

The problem is with Page Setup in your personal Address stack. In the page setup
of your Address stack, choose Options, and make sure that "Precision Bitmap
Alignment (4% Reduction) is NOT chosen. Try the copy again, and it should work
fine.

Note: In the Reports dialog box in HyperCard version 2.1 there is no Save
button, whereas there is a Save in version 2.2. A Save dialog does appear
whenever a new report is created or an old report is changed, and the user
chooses Print or Cancel (the only two options).
