Chinese Language Kit: System Crash with ADDMotion II (6/94)

```
Article Created: 22 Jun 1994

TOPIC -----------------------------------------------------------

On a system with the Chinese Language Kit (1.0 or 1.1) installed, you may
experience problems when adding a HyperCard animation with ADDMotion II. Your
system will hang, quit with Type 2 error, or drop into MacsBug when executing
the instruction NewFilter.

DISCUSSION ------------------------------------------------------

Removing the WorldScript II extension (or disabling Extensions) works around
this problem, but prevents you from using the Chinese Language Kit until you
restart your system with the WorldScript II extension on.

This problem likely affects the Japanese Language Kit v1.1 also; however, the
Japanese Language Kit v1.0 is compatible.
