HyperCard 2.3: Manual Error Wrong Instructions On Pg 137 (5/95)

Article Created: 16 May 1995

TOPIC -----

This article describes an error in the new "Getting Started" manual for HyperCard 2.3.

DISCUSSION -----

On page 137 of the Getting Started manual for HyperCard 2.3 it says the following:

"You need to change the stack's openStack handler. Replace the line
addColor install with addColor install, 24 or
addColor install with addColor install, 24,
depending on the bit depth you want."

This instruction is telling you to do the same replacement twice.

In reference to the note on page 56, it is obvious that the note on page 137 should say addColor install, 16 or addColor install, 24.

This error in the HyperCard "Getting Started" manual has been forwarded to the HyperCard team for review and revision in future releases.
