# HyperCard 2.3: Installs AppleScript 1.1 not 1.1.1 (5/95)

Article Created: 16 May 1995

TOPIC -----------------------------------------------------------

The installer for HyperCard 2.3 says that it will install AppleScript 1.1.1.
However, the AppleScript installed on my Macintosh PowerBook Duo 280c by the
HyperCard 2.3 installer is version 1.1. Why?

DISCUSSION -------------------------------------------------------

Apple is aware of this issue. The installer is incorrect in reporting that it
will install AppleScript 1.1.1. This has nothing to do with which computer you
have or how you ran the HyperCard 2.3 installer. AppleScript 1.1 is the correct
version.
