### TOPIC -----

I need a Kanji-to-English (and vice versa) translator for the Macintosh. I have the Kanji software for the Macintosh. Do you know of any product that does this? Could something be developed to do this?

### DISCUSSION -----

We don't know of any product that can do this type of translation. If anyone is aware of a product that does this, please send an AppleLink to the TECH.DB address and we'll post the information here.

We are aware of a product called "The Translator" that is capable of doing an English to Japanese translation. It is produced by Qualitas Trading Company.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
