Indian Language Kit: Fonts Appear Garbled (2/97)

Article Created: 14 February 1997

TOPIC ---

I recently installed the Indian Language Kit on my Power Macintosh 8100
computer, and I have realized that when I switch keyboard layouts the fonts
appear garbled. What could be causing this?

DISCUSSION --

This issue may occur on any NuBus-based Power Macintosh computers that are using
system software older than Mac OS 7.6. This was noted in the Indian Language Kit
Read Me file, and the solution is to switch to a keyboard layout of another
language and then switch back to the desired keyboard layout.
