Korean Language Kit: Installation Options (12/96)

Article Created: 18 December 1996

TOPIC -----

This article contains questions about the installation options for the Korean Language Kit.

Questions Answered in this Article

=====

- 1) What are the minimum items needed to install the Korean Language Kit, and how much free space on the hard disk does this installation require?
- 2) What items are installed when I select the Easy Install option for the Korean Language Kit, and how much free space on the hard disk does this installation require?
- 3) What specific files and fonts are installed into the System Folder when I use the Easy Install option to install the Korean Language Kit?
- 4) What items do I need to Custom Install if I wish to install all of the items included with the Korean Language Kit, and how much free space on the hard disk does this installation require?

DISCUSSION -----

1) Question: What are the minimum items needed to install the Korean Language Kit and how much free space on the hard disk does this installation require?

Answer:

Minimum Install

=====

Choose Custom Install from the pop-up menu in the Korean Language Kit installer window. Check the following items to install the minimum items necessary to use the Korean Language Kit:

- * Korean Language Support, which includes:
 - Korean support files
 - System resources
 - Seoul font
 - Korean Input Method

- Language Register
- * Read Me and SimpleText

This installation requires approximately 8 MB of free space available.

2) Question: What items are installed when I select the Easy Install option for the Korean Language Kit and how much free space on the hard disk does this installation require?

Answer:

Easy Install

=====

The following items are installed if you choose Easy Install from the pop-up menu in the Korean Language Kit installer window:

- * Korean Language Support, which includes:
 - Korean support files
 - System resources
 - Seoul font
 - Korean Input Method
 - Language Register
- * Read Me and SimpleText
- * AppleGothic Font
- * AppleMyungjo Font

Note that the only items that are installed beyond the Minimal Install are the AppleGothic and AppleMyungjo fonts.

This installation requires approximately 20 MB of free space available.

3) Question: What specific files and fonts are installed into the System Folder when I use the Easy Install option to install the Korean Language Kit?

The following files and fonts are installed when you use the Easy Install option to install the Korean Language Kit.

System Folder

=====

- Asian Font Arbitrator v1.0.3
- Font Cache
- Hanja.Dic

Fonts Folder

=====

- AppleGothic (suitcase)
- AppleGothic (file)
- AppleMyungjo (suitcase)
- AppleMyungjo (file)
- GHanja24Disk
- GSymbol24Disk

- Hanja24Disk
- Korean Font Icons v7.5.3
- KSSymbol12
- KSSymbol24Disk
- Seoul (suitcase)
- Seoul (file)

Extensions Folder

=====

- FontExtension (Bitmap).K42
- FontSize Patch v1.0
- Inline Support v1.1.3
- Inliner v2.2.3
- InputBackSupport v7.5.3
- Language Kit Additions folder (contains localized menu and dialog resources)
- Language Kit Extension v7.5.3
- Power Input Method v2.0
- WorldScript II v7.5.1
- WorldScript Power Adapter v7.5.3

4) Question: What items do I need to Custom Install if I wish to install all of the items included with the Korean Language Kit, and how much free space on the hard disk does this installation require?

Answer:

Full Install

=====

Choose Custom Install from the pop-up menu in the Korean Language Kit installer window. Check the following items to install all of the items included with the Korean Language Kit:

- * Korean Language Support
 - Korean support files
 - System resources
 - Seoul font
 - Korean Input Method
 - Language Register
- * Read Me and SimpleText
- * AppleGothic Font
- * AppleMyungjo Font
- * Gungseoche Font
- * Pilgiche Font

Note that the only items that are installed beyond the Easy Install are the Gungseoche and Pilgiche fonts.

This installation requires approximately 30 MB of free space available.
