Arabic Language Kit: Character Encoding Type (7/96)

Article Created: 25 July 1996

TOPIC ---

I am using the Arabic Language Kit (ALK), and I am trying to import Arabic text
from a non-Macintosh computer. What type of character encoding does ALK use?

DISCUSSION --

The character encoding table used in the Arabic Language Kit is shown on page
A-21 of the Installation and User's Manual for the ALK. This encoding method is
essentially ISO 8859-6 plus a set of punctuation for Arabic and Arabic digits.
OSMO 449 is based on IS0 8859-6.
