Hebrew Font: Characters Appear as Squares (9/93)

Article Created: 1 September 1993

TOPIC -----

When booting from the Hebrew Installation disk #1, the Hebrew font isn't properly loaded and all of the characters appear as squares.

DISCUSSION -----

This is a known problem, however the workaround is very easy. It requires that you lock the installation disk before booting the system. If the disk isn't locked, the fonts aren't loaded properly and the font defaults to Geneva. The Hebrew characters map to the square character in Geneva.

The disk is also corrupted. If you created your disks from the Developer CD, just recreate the disk and be sure to lock it before booting from it.
