QuickDraw GX: Read Me File Error and WorldScript II 7.2 (2/95)

Article Created: 6 September 1994
Article Reviewed/Updated: 27 February 1995

TOPIC ---

The QuickDraw GX "URGENT--Read Me!" file that comes with System 7.5 installation
disks states "Make sure you are using WorldScript II version 7.2 or later.
QuickDraw GX is not completely compatible with versions of WorldScript II prior
to 7.2." This information is incorrect.

DISCUSSION ---

Using WorldScript II v7.2 is not enough to ensure Apple language kit
compatibility with QuickDraw GX under System 7.5.

Chinese Language Kit

An updater has been posted to many online services which will provide the
Chinese Language Kit compatibility with System 7.5. The Chinese Language Kit
Updater Version 1.0 updates the Chinese Language Kit to version 1.1.1.

Japanese Language Kit

Apple will release an update for the Japanese Language Kit in Spring 1995 time
frame. The update will be compatible with System 7.5 and QuickDraw GX.

For users of the Japanese Language Kit who need immediate compatibility, they
can run their language kit with System 7.5 using and interim update available on
CompuServe, eWorld, AppleLink, and the Internet. (Located in System Software
directory).

These articles can help you locate the software update mentioned here:

• Where To Find Apple Software Updates
  Lists online services for "free" Apple software updates.

• Obtaining Apple Product Support in the USA
  Lists 800 numbers and online services for software updates, Apple
  support information, and a subset of the Apple Tech. Info. Library.

Article Change History:
27 Feb 1995 - Added information about the CLK and JLK Updaters.
15 Feb 1995 - Reviewed for technical accuracy, revised System 7.5 keyword.
