## Chinese Language Kit: Must Remove Launcher to Install (10/96)

Article Created: 25 September 1996

Article Reviewed/Updated: 2 October 1996

TOPIC -----

I am attempting to install the Chinese Language Kit onto my computer, but an error message occurs stating that it "cannot install onto this version of \_Performa\_ software." However, I do not have a Macintosh Performa computer, so I do not understand why this error is occurring.

DISCUSSION -----

The error message is confusing, but the solution is the same whether or not you have a Macintosh Performa computer. To Install the Chinese Language Kit 1.0 under System 7.5.x, you must remove the Launcher from the Control Panels folder. This will then allow the installation to take place. However, you will also need to install the Chinese Language Kit Update 1.1.1, available online, to be compatible with System 7.5.x.
