7.5.1 WorldScript Installer: Read Me (6/96)

Article Created: 03 June 1996

TOPIC ---

This article contains the ReadMe file for the 7.5.1 WorldScript Installer.

DISCUSSION --

```
7.5.1 WorldScript Installer
===========================
```

Who Should Install WorldScript?

This installer will install files needed by WorldScript technology for users
running Mac OS 7.5 and above. Users of the Japanese and Chinese Language Kits or
applications which depend on WorldScript technology should install these pieces
as they improve the stability and performance of your system. QuickDraw GX and
Power Macintosh users should upgrade to these pieces as they provide important
improvements over previous versions.

Using the WorldScript Installer

The Easy Install option of the WorldScript Installer updates your existing
WorldScript files. If you want to install additional files, you can use the
Custom Install option of the Installer.

1. To open the WorldScript Installer, double-click the Installer icon on the
disk you received with your WorldScript update package.

2. To update existing WorldScript files on your startup hard disk, click
Install.

To install additional files, choose Custom Install from the pop-up menu, then
click to put an X in the box next to each item you want to install. When you're
finished choosing items, click Install.

The files are installed on your hard disk. You may be prompted to restart your
computer after installation.

About the WorldScript Installer

The WorldScript Installer installs the following files:

WorldScript I (version 7.5.2) used for complex one-byte processing of languages such as Arabic and Hebrew,

WorldScript II (version 7.5.1) used for two-byte processing of languages such as Chinese, Japanese, and Korean,

InputBackSupport (version 7.5.3) provides support for two-byte fonts; automatically installed with WorldScript II.
