Macintosh AV Computers: PlainTalk Installation Problems (10/93)

Article Created: 20 October 1993

TOPIC -----

Installation of PlainTalk software on an AV CPU using the installer on the PlainTalk disk generates a dialog box asking for the PlainTalk 5 or Introduction to Speech disk. These disks weren't included with AV computers configured for the United States.

DISCUSSION -----

You can successfully install just the PlainTalk software by doing a Custom Install from the Install Me First disk included with System 7.1.
