PC Exchange: Max of All Partition Names is 32 Characters (7/96)

Article Created: 8 July 1996

TOPIC -----

I partitioned my hard drive, and now when I open PC Exchange and select the Option button, a system error occurs. What is wrong?

DISCUSSION -----

If the number of characters in the names of all the partitions is greater than 32, PC Exchange will crash when the Option button is selected.

The workaround is to either use fewer partitions or rename the partitions with smaller names.

This issue will be corrected in a future version of PC Exchange.
