AppleShare 3.0: Custom Icon

Article Created: 3 December 1992

TOPIC ---

I have put a custom icon on a folder on my AppleShare 3.0 server. A client
who doesn't have access privileges, can't see the custom icon. What's
going on?

DISCUSSION --

Custom icon information is contained in an invisible file within the
folder it's assigned to. If you don't have access privileges to a
folder, you can't access the custom icon file either.
