AppleShare Support: AppleCD SC And WORM Drives

This article last reviewed: 26 January 1989

Currently, an AppleShare File Server requires that all drives (volumes)
attached to the server support read AND write access. The one exception to
this rule is the AppleCD SC, which is supported.

Since a WORM (Write Once, Read Many) drive does not allow true read and write
access, it is not supported by AppleShare.
