MacDFT: Supports Only Coax/Twinax & TokenTalk NB Cards

Article Created: 22 September 1989

Article Reviewed/Updated: 26 July 1993

TOPIC -----

Does MacDFT work with either AppleLine or DCA's (formerly Avatar) MacMainFrame DX?

DISCUSSION -----

MacDFT supports only the Coax/Twinax Card and the TokenTalk NB card. MacMainFrame DX requires DCA (formerly Avatar) own software. AppleLine will continue to be supported by the 3278 terminal option in MacTerminal.

MacDFT will not work with AppleLine (the interface is VT100 and needs MacTerminal). MacDFT will not work with MacMainFrame DX. DCA (formerly Avatar) has released their new DFT software for beta testing.

Article Change History:

26 July 1993 - Company title changed from Avatar to DCA (Digital Communication Associates).

31 August 1989 - Updated for technical accuracy.
