MacX25: Compatibility with Bridges and Routers

This article last reviewed: 25 September 1989

TOPIC ---

What are the support and compatibility concerns of MacX25 and bridges and/or
routers?

DISCUSSION ------------------------------------

MacX25 and the Internet Router can run on the same Macintosh II. However,
MacX25 1.0 does not let you connect two AppleTalk networks together over X.25.
In other words, one cannot run MacX25 with the Internet Router and expect to
link two AppleTalk networks together over X.25.
