System 6.0.2: Incompatible With SoftPC v1.2

This article last reviewed: 11 November 1988

SoftPC v1.2 is incompatible with System 6.0.2. When launching SoftPC under
MultiFinder, the application unexpectedly quits. When the application is
relaunched, an "illegal instruction encountered" error message is received. If
you click the Reset button at this point, SoftPC starts up and runs without any
problems.

The current version of SoftPC, v1.2.1, corrects the problem. To upgrade your
copy of SoftPC, provide Insignia Solutions with the serial number of your
SoftPC software, your name, and mailing address.

For more information, search on "Insignia Solutions".
