AICK Installer: QuickDraw GX and Acrobat Reader Fonts (1/96)

Article Created: 25 January 1996

TOPIC ---

After I installed the Apple Internet Connection Kit (AICK) and then restarted my
computer, an error dialog appeared with this message, "The installed
substitution fonts are not designed to work with QuickDraw GX." What is wrong?

DISCUSSION --

This error occurs if AICK is installed when QuickDraw GX is already installed on
your computer. There is a compatibility issue between QuickDraw GX, and the
Adobe Acrobat Reader and accompanying fonts which AICK installs.

A solution is to install Acrobat Reader from a different source. The Acrobat
Reader installer checks to see if QuickDraw GX is installed and then installs
the appropriate fonts. Acrobat Reader is included on most new system CD-ROM
discs, or it may be downloaded from an online source.
