## MacTerminal 2.2: Launching Error May Be Caused By CNFG (10/94)

```
Article Created: 17 December 1987
Article Reviewed/Updated: 12 October 1994

TOPIC -------------------------------------------------

There is a minor problem that occurs when a desk accessory or driver containing
a resource titled CNFG is installed in the System file.

DISCUSSION --------------------------------------------

MacTerminal 2.2 does not check to see whether a particular CNFG resource belongs
to the System or to a desk accessory within the System. As a result, users may
see an error message when MacTerminal is launched. The message, though annoying,
does not indicate any actual error.
