## MacTerminal 2.3 Does Not Use F Keys

This article last reviewed: 16 June 1988

MacTerminal 2.3 does not use the function keys on the extended keyboard. However, it still contains the PF key menu for VT100 and IBM 3278 as in previous versions. You can use MacroMaker to select the keys, and then assign a recording of the PF key menu selection to each function key. You can also type and record keyboard sequence with MacroMaker.

The key sequences for the VT100 PF keys are: (ESC OP)=PF1, (ESC OQ)=PF2, (ESC OR)=PF3, (ESC OS)=PF4.

The IBM 3278 PF keys are:

Key Sequence	Menu option
[ESC 1, ESC 2,... ESC 9, ESC 0, ESC -, ESC =]	= PF1, PF2, ... PF12
[ESC !, ESC @,... ESC (, ESC ), ESC _, ESC +]	= PF13, PF14, ... PF 24
[ESC [, ESC ],	= PA 1 and PA 2

ASCII	Key Sequence	Menu option
<SOH>	= CONTROL A	= Attn
<DLE>	= CONTROL P	= Home
<FS>	= CONTROL \	= Print
<ACK>	= CONTROL F	= Erase EOF
<DEL>	= CONTROL (Backspace or Delete)	= Delete
<FF>	= CONTROL L	= Erase Input
<GS>	= CONTROL ]	= Insert
<DC2>	= CONTROL R	= Reset
<STX>	= CONTROL B	= Sys Req
<ENQ>	= CONTROL E	= Clear
