Shiva/MacTerminal Conflict

This article last reviewed: 11 June 1990

TOPIC --

I have a problem with a Macintosh Plus connected to our AppleTalk network,
which has a Shiva Telebridge. Recently, I purchased MacTerminal and tried to
load it onto the Macintosh Plus. MacTerminal will not load if the Shiva
Telebridge software is in the System Folder.

DISCUSSION ---

Shiva told us that MacTerminal and the Shiva software can coexist if the
customer chooses "set Shiva config" in the Control Panel and selects "emulate
modem port".   Contact Shiva tech support for more information.
