Macintosh OS and A/UX: Transfer Files between the Two (9/94)

Article Created: 31 March 1988
Article Reviewed/Updated: 13 September 1994

TOPIC --

How can I transfer files between Macintosh OS and A/UX?

DISCUSSION ---

A/UX 3.0 supports File Sharing. The Macintosh running A/UX can act as both an
AppleShare client or a server (using File Sharing, not AppleShare 3.0 or 4.0).
Turn on file sharing on either the Mac OS machine or the A/UX machine. Then
mount the shared volume from the other machine and copy the files.
