RFT: DisplayWrite Compatibility

Article Created: 14 April 1988
Article Last Reviewed: 7 August 1992
Article Last Updated:

TOPIC -----

Can the RFT (Revisable Form Text) converters be used to interchange files with DisplayWrite 370 running on an IBM mainframe running VM/CMS?

DISCUSSION -----

Apple's compatibility guarantee only applies to characters and codes present in DisplayWrite 3/4 and DisplayWrite 370. These three IBM programs are not totally compatible with one another. This is particularly true in their use of formatting control codes and ASCII-Extended Character Set. Copyright 1988, Apple Computer, Inc.
