## NFS Client for Macintosh

Article Created: March 9, 1991  
Article Reviewed Only: 11 August 1992  
Article Last Updated: 11 August 1992

TOPIC -----

Where can I get an NFS client package for the Macintosh?

DISCUSSION -----

Both Wollongong and InterCon make such a product.

InterCon's NFS/Share supports mounting of multiple volumes from different servers, host-based user authentication, yellow pages, SNMP, Chooser access, and more.

Wollongong Group, Inc., publishers of MacPathWay software, have an NFS client package for Macintosh called PathWay Client NFS for Macintosh. The product allows a Macintosh to share files with any NFS server.

For more information, search on "InterCon" or "Wollongong".
