## Performa: Shut Down Desk Accessory (10/93)

Article Created: 25 October 1993

TOPIC -----

My Macintosh Performa has a desk accessory called Shut Down in its Apple menu.

What does it do?

DISCUSSION -----

The ShutDown DA allows you to properly shutdown your Performa from any application which supports the Apple Menu. You simply open the DA and select Shut Down, instead of switching out of your current application to the Finder, then selecting Shut Down from the Special menu.

The Shut Down DA doesn't disable the normal shutdown method; you can still switch to the Finder and select Shut Down from the Special menu.
