Changing Size Of Launcher Buttons (12/95)

Article Created: 14 April 1995
Article Reviewed/Updated: 21 December 1995

TOPIC ---

How do I change the size of the buttons in the Launcher? Can I make the buttons
a custom size?

DISCUSSION --

No you cannot make your own custom sized buttons, but you can change their
sizes.

The ability to change button sizes in each panel was added with Launcher version
2.5. Previous versions do not support this feature.

Changing Launcher Button Size:

Step 1
Hold down the Command key and press the mouse button while the pointer is over a
section of the background pattern in the Launcher window.

Step 2
A menu will appear, with the choices of small buttons, medium buttons, or large
buttons.

Step 3
Select the desired size and release the mouse button and the Command key.

NOTE: To change each panel to the same button size, you must change each panel
individually. Each panel is independent of the others.

Article Change History:
21 Dec 1995 - Added information on panel independence.
